

PROJECT 1
MOBILE APP PROGRAMMING
NAME: MEGHALAA A/P JAIKUMARAN
CLASS: 2SE2
MATRIC NUMBER: A211393

PROBLEM STATEMENT

Problem Statement: Many students struggle to stay focused and organised when studying independently. They have no simple tool to plan their study schedule, track their focus time, or test their own knowledge through quizzes or flashcards.

Why it matters (SDG 4: Quality Education): Without structure and self-motivation tools, students study less effectively, leading to poor academic performance. This unfairly affects students who study alone without tutors or structured guidance.

Solution: Focus Buddy is a mobile study companion app that helps students plan study slots by subject, track focus sessions using a Pomodoro timer, test themselves with subject-based quizzes, create flashcards, and watch their virtual pet grow as they earn XP points turning studying into a consistent and rewarding habit.
